📍 West Lafayette, Indiana 📞 (765)-409-1715 **in** wenxin-jiang

## EDUCATION

**Ph.D.**, Electrical and Computer Engineering, Purdue University, IN, USA Aug 2020 - present  
GPA: **3.7/4.0**, Supervised by Prof. **James C. Davis**

**B.S.**, Applied Physics, Southeast University, Jiangsu, China Aug 2016 - Jun 2020  
- **Study Abroad Program**, GPA: **3.8/4.0**, Engineering Physics, UC Santa Barbara, CA, USA Mar 2019 - Jun 2019

Relevant **Courses**: Software Engineering, Artificial Intelligence, Deep Learning, Computer Vision, Computer Network Systems, Operating Systems, Compilers, Computational Models & Methods

## RESEARCH & WORK EXPERIENCE

**Software engineering support for pre-trained deep learning models**, *Research Assistant* Feb 2022 - present  
- **Lead a team** of students, conducted an empirical study on pre-trained deep learning model supply chain.  
- Measure the trustworthiness of deep learning model registries through **model audit**, **risk analysis**, and **interviews**.

**A Machine Shop Dataset for Computer Vision**, *Research Assistant* May 2022 - Aug 2022  
- **Lead a team** of students, **collected video data** of safe and unsafe behavior in campus workshop.

**Empirical Study on Computer Vision Reengineering**, *Research Assistant* Jan 2021 - Mar 2022  
- **Lead a team** of students, collect open-source bug reports, and analyze the dataset.  
- Conduct a case study on a reengineering team cooperating with Google, and present findings in a paper.

**TensorFlow Model Garden Team (Google x Purdue)**, *ML engineer, team leader* Sep 2021 - present  
- **Lead a team** of 6 students reproducing a recent computer vision model, *i.e.*, YOLOX.  
- Contribute to development and testing of model architecture and component integration.

## PUBLICATIONS

- Montes, Peerapatanapokin, Schultz, Guo, **Jiang**, and Davis. *Discrepancies among Pre-trained Deep Neural Networks: A New Threat to Model Zoo Reliability*. Proceedings of the 30th ACM Joint European Software Engineering Conference and Symposium on the Foundations of Software Engineering — Ideas, Visions, and Reflections track (ESEC/FSE-IVR'22).
- Synovic, Hyatt, Sethi, Thota, Shilpika, Miller, **Jiang**, Amobi, Pinderski, Laufer, Hayward, Kingensmith, Davis, and Thiruvathukal. *Snapshot Metrics Are Not Enough: Analyzing Software Repositories with Longitudinal Metrics*. Proceedings of the 37th IEEE/ACM International Conference on Automated Software Engineering — Demonstrations track (ASE-Tool Demonstrations'22).
- Veselsky, West, Ahlgren, Thiruvathukal, Klingensmith, Goel, **Jiang**, Davis, Lee, and Kim. *Establishing trust in vehicle-to-vehicle coordination: a sensor fusion approach*. Proceedings of the 2nd Workshop on Data-Driven and Intelligent Cyber-Physical Systems for Smart Cities (DI-CPS'22).
- Banna, Chinnakotla, Yan, Vegesana, Vivek, Krishnappa, **Jiang**, Lu, Thiruvathukal, and Davis. *An Experience Report on Machine Learning Reproducibility: Guidance for Practitioners and TensorFlow Model Garden Contributors*. arXiv. 2021.

## SKILLS AND INTERESTS

**Technical Skills**: Python, Java, C/C++, Unix, Git, Mathematica, MATLAB

**Libraries**: Numpy, Pandas, Matplotlib, TensorFlow, Pytorch

**Languages**: Mandarin (Native), English

**Personal Interests**: Photography, Cooking, Guitar
