RESEARCH THEME

My research interest is mainly focused on Software engineering for AI (SE4AI). I am also interested in studying AI systems, software supply chain security, and trustworthy/responsible AI. My current work focuses on novel approaches to improve multiple aspects of pre-trained AI model supply chain, including trustworthiness, reusability, and security.

EDUCATION

| Ph.D, Electrical and Computer Engineering, GPA: 3.6/4.0 Purdue University, West Lafayette, IN | 2020–2025 |
|--|-----------|
| M.Sc., Electrical and Computer Engineering Purdue University, West Lafayette, IN | 2024 |
| B.Sc. Applied Physics , GPA: 3.3/4.0 Southeast University, Nanjing, China | 2016–2020 |
| Study Abroad Program, Engineering Physics, GPA: 3.8/4.0 | 2019 |

PROFESSIONAL EXPERIENCE

Graduate Research Assistant

2021-present

Purdue University — Supervised by James C. Davis

- · Conduct empirical analysis and mine software repositories to enhance pre-trained AI model reuse.
- · Develop automated tools to improve transparency and security of open-source AI model supply chain.

Software Engineering Research Intern

University of California, Santa Barbara, CA

July – October, 2024

Socket — Supervised by Mikola Lysenko

- Designed data collection infrastructure for Hugging Face model package data and metadata migration to PostgreSQL database.
- Developed an LLM-based pickle malware scanner for PyPI and Hugging Face artifacts.
- Researched a novel typosquatting detection method using FastText and contrastive learning to generate embeddings, applying clustering algorithms to reduce overhead in identifying similar package names.

TensorFlow Model Developer

2021 - 2023

 $Purdue\ University imes Google\ - Supervised\ by\ Abdullah\ Rashwan$

 Led a team of 20+ undergraduate students in replicating state-of-the-art AI models, including object detection (YOLO family) and panoptic segmentation models (Maskformer family), in TensorFlow for Google's TensorFlow Model Garden Team. Managed tasks, component integration, and unit, differential, and end-to-end testing, achieving comparable performance to the original implementations.
